There are many men who keep their consciences exremely sinsitive to the omissions and commissions of other people. Our friend and kinsman, Mr. John Bull, as long been in possession of a very delicate conscience this class. Deeply and keenly does he feel the naughmess of France, the cruelty of Naples, the tyranny of the following to an impartial public : Russia; his head becomes a fountain of tears whenever e has occasion to bewail the errors and misdeeds of apper lip, and do not begin the dinner with soup. But not only advertise it, but give it this favorable notice unasked from the sort of paternal interest he feels in Brother Jon- by the proprietor.—Handel Zeitung, N. Y. rom the sort of paternal interest he feels in Brother Jonthan, he watches with great anxiety the course of that uterprising and energetic youth, and seems to be in a tate of chronic alarm lest this vigorous scion of the axon stock should push his lateral roots too far, and

The sentiments of the London press, translated into plain conversational blvice, would run somewhat after this fashion: "My lear Jonathan, let me give you a bit of advice. I am der than you, and of course wiser; and am actuated what I say by nothing but a sincere regard for your interests. Jonathan, never annex. It is very naughty o annex. You should be content with what you have got. You should cultivate a spirit of moderation. It was very wrong of you to take Texas in the way you dd. It was highly improper of you to take California see plainly that your mouth is watering for Cuba; but you cannot have it, and must not have it. Such a thing s never for a moment to be thought of; and I beg you lay aside all dreams and all hopes of it, because it can bever be permitted." To which Brother Jonathan might appropriately reply:—" Excellent and venerable Bull, you speak like an oracle. The words of instruction come mended from your lips. Wisdom will die with you when ou die. But allow me in the most delicate manner in be world to insinuate that there is the slightest possible discrepancy between what you say and what you do. Bladen. It strikes me that you have done a good deal of annexain your day, in America, Asia, and Africa, and that ou have not yet retired from the business. And talkg about islands, did you not in the most quiet way in world take possession the other day of a small island the Red Sea, just because it was extremely convenient, or in other words, because you wanted it very much ?-My dear Bull, never did a more magnificent beast than is shaggy breast. I admire the spread of your horns, the length of your tail, the depth of your roar; but if you should have pared off from you all that you have haid on by successive annexations, you would shrink to the dimensions of a good sized bull-frog. Now I don't Want Cuba, and I don't mean to take it; but if I did want it, and sought to find some perfectly sound and moral grounds on which it became my duty to annex it, it is in the Chronicles of the House of Bull that I should look for them."-Boston Courier.

We do not know that we agree with the Courier in not wanting Cuba, or not being willing to take it, but months and 17 days. We do agree in our estimate of John Bull.

Terrible Weather on the Platns. Snow Storm-Drifts Ten Feet Deep-Suf fering of a Mail Party-Several Frozen to Death.
The Western Platte (Mo.) Argus, of the 7th inst. has obtained from Mr. John M. Guthrie the subjoined particulars of the great snow storm on the plains, already briefly mentioned by telegraph:

Mr. G. left Salt Lake on the 27th November, with the mail on packed animals, in company with G. A. Beadly, of New York. It had been snowing for seven or eight days before Mr. G. left the valley. The snow was from one to six feet deep in the Big Mountains, and they had to tramp the snow to pass with their animals. Second day out the snow was so deep that the company got lost, and lay out all night, and the men in charge of he mail had their feet and hands frozen, and their boots had to be cut off of their feet the next morning.

The third day they made Fort Bridger at sunset, and after traveling about twenty miles got lost again, and were compelled again to lay down in the snow till morning. Fourth day they made Big Sanday station, and lef there about two o'clock in the evening and traveled about twenty miles, wind blowing from the east. The storm increased so as to prevent them from seeing five feet before them, and compelled them again to lay up .-They camped in a hollow, and during the night snow drifted on them to the depth of three feet. Here the whole company almost froze. Mr. G. states that his feet and legs were so numb as to be almost unable to stand up. The mail men, having no bedding, were compelled to walk around all night to keep from freezing.

Fifth day, left early in the morning—traveled eight miles; one of the mail men's face and hands froze, and the other was so far frozen as to be almost asleep. Mr. G. here finding that the men would freeze, took them off and made them walk. They then turned and went back 28 miles to Big Sandy. The next day the wind ceased, and they started, in company with Mr. Ashton, the mail agent. They reached the South Pass at dark. Here the wind raised again-the snow being drifted from five to ten feet deep, and they again became lost. For three or four hours they wandered round in hopes to find the roads, and their only hope was to face the Stamp of Great Britain, to prevent counterfeits. wind in order to reach Sweet Water, which they did .-They then attempted to travel down this stream, but the three months of Pregnancy, as they are sure to bring on

This is a purely vegetable compound, prepared on strictly scientific principles, after the manner of the celebrated Holland Professor, Borhave. Because of its great success in most of the European States, its introduction into the United States was intended more especially for those of our fatherland scattered here and there over the face of this mighty country. Meeting with great success among them, I now offer it to the American public, knowing that its truly wonderful medicinal virtues must be acknowledged. It is particularly recommended to those persons whose

HICKORY GROVE, St. Charles Co., Mo., Nov. 19, 1856. PROF. O. J. WOOD—Dear Sir: Some time last summer we were induced to use some of your Hair Restorative, and

> PROF. O. J. WOOD—Dear Sir: I have used two bottles of Professor Wood's Hair Restorative, and can truly say it is the greatest discovery of the age for restoring and changing the Hair. Before using it I was a man of seventy. My hair has now attained its original color. You can recommend it to the world without the least fear, as my case was one of the worst kind.
